

TESTIMONIALS

"I have never in my life been so thankful to have a product in my house. I will forever be thankful for LifeVac because my daughter's birthday could have had a much scarier outcome." - R. Rivera

"Thank you again for making such a wonderful device- and ultimately saving my daughter's life."
- C. Langley

"We keep a LifeVac in our house, our car, and her diaper bag at all times. I am eternally grateful for this device and its role in helping to save our little girl!" - K. Self

HOW LIFEVAC WORKS

CHOKING STATISTICS:

- A leading cause of death in children
- 5,000 deaths yearly
- One child dies every 5 days from choking
- Choking leads to 100,000 visits to the ER yearly
- More people die from aspirating than die in fires, drowning, or accidental shootings
- Leading cause of accidental deaths in persons over the age of 65

TIME IS OF THE ESSENCE

- 0-4 minutes: Brain damage unlikely
- 4-6 minutes: Brain damage possible
- 6-10 minutes: Brain damage probable
- 10 minutes +: Probably brain death
- Average emergency response time is 7 to 12 minutes
